

Are you an Adult with Asperger Syndrome? Would you like better health services in Ontario?

What has your experience been like using health services such as doctors, dentists or psychologists? We have heard stories from individuals describing both poor and excellent care. We want to understand better why things work well, and why they fail. It is only from hearing your experiences that we can learn what works and what doesn't and share this information with doctors and other health professionals, government and people like you to help bring about change.

This project will ask you questions about your recent contact with health professionals. The first set of questions takes about 30 minutes, and follow-ups over the next year take 10 minutes or less. We want to know if you are getting the health care you need, what types of health services you are using and your satisfaction with these services. Also, if you are not using any services, we would like to know why and whether you are satisfied with your situation. Your voice is important and we need to hear from you!

You will receive an honorarium for your time.
